

## ON THE BOOKSHELF

### Wildlife of the Farne Islands: A guide to all major breeding species

**Kaleel Zibe**  
Kaleel Zibe Photography  
£15.99, paperback  
ISBN 9780956929600

This book is informative, interesting, and beautifully illustrated. Kaleel Zibe is both a photographer and a wildlife expert and he knows how to achieve the balance between the

two. Within the pages of Zibe's handy, kitbag-sized offering you'll find detailed information on the birds of the Farne Islands, as well as a slightly shorter chapter covering the grey seal. There are also tips on how to reach the island, and a section of photographic advice.

What really makes this book, though, are the images. From stunning shots of terns in flight to baby cormorants and inquisitive seals, they bring the facts to life and provide a real inspiration to get out there to experience nature at its best.

### 360° London: The Greatest Sights of the World's Greatest City in 360°

**Nick Wood**  
Carlton  
£25, hardback  
ISBN 9781847326034

London is, undoubtedly, one of the most visually arresting and divergent cities in the world, so capturing its feel in a single image can be incredibly challenging. But, with his 360° panoramas, Wood has done just that.

Presenting a mix of well-known tourist favourites, historic landmarks, and quirky institutions, like cabbies cafes and all night eateries, Wood captures the eclectic aspects that make London what it is. Following the main artery of this great city, the river Thames, Wood turns his camera on sights such as Mayfair penthouses, which will have any Londoner green with envy, and artists studios. He also includes short, informative bursts of text on things as diverse as the city cycle scheme and Soho deli. Nick Wood is a man who clearly loves his city, and his passion is translated into his captivating images.

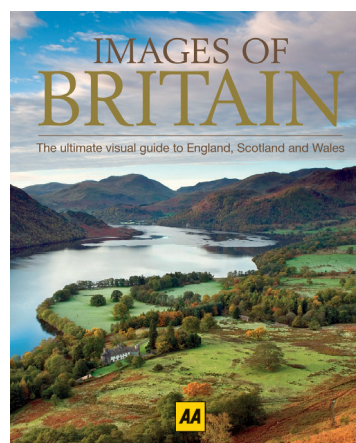

### Images of Britain: The ultimate visual guide to England, Scotland and Wales

AA Publishing  
£20, hardback  
ISBN 9780749572006

Britain may be a small island but there's an awful lot to see, and it's all too easy to let this pass you by in the general whirlwind of everyday life.

Divided into three sections; England, Scotland and Wales, Images of Britain takes a closer look at the sights to be found, as it covers each country, county by county.

From Wrest Park's country manor, in Bedfordshire, to picturesque North Yorkshire

fields at sunset, the book will reinvigorate your passion for your local patch - because you don't always have to fly halfway around the world to see something spectacular. Accompanying each of the 400-plus images is an extended caption giving more detailed information about the specific area and revealing the stories behind some of Britain's

most fascinating locations. At its heart, *Images of Britain* is a celebration of the British landscape and a testament to its impressive variety and beauty.

### Going Pro: How to make the leap from aspiring to professional photographer

**Scott Bourne and Skip Cohen**  
Amphoto Books  
£21.99, paperback  
ISBN 9780817435790

With combined experience spanning over 70 years, Bourne and Cohen have amassed some useful information about the industry and what it takes to be successful in such a competitive and expanding marketplace.

Divided into 11 distinct

and well-illustrated chapters, covering topics as diverse as defining your niche, outsourcing, and four chapters dedicated to making online marketing tools work for you, this is a brilliant starting point for anyone wishing to take their photography to the next level.

But, it's not for those who are just starting out. Although there are a few technical tips, there's very little advice on how to improve your photography.

Concise summaries and quotes from professional photographers help make *Going Pro* a valuable resource for someone with the skills but not necessarily the business experience to turn their hobby into a career.
